Mumbai, India | +91 7208396020 | vaibhavidavee@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

B.Sc. Information Technology graduate skilled in **MERN Stack and C#/.NET full-stack development**. Experienced in building scalable web applications, REST APIs, authentication systems, and responsive user interfaces using **React.js, ASP.NET Core, Node.js, SQL Server**. Strong understanding of MVC architecture, database management, and frontend-backend integration.

TECHNICAL SKILLS

Programming	JavaScript (ES6+), C#
Frontend	React.js, HTML5, CSS3, Angular, Bootstrap, Tailwind CSS
.NET & Backend	ASP.NET Core MVC, ASP.NET Web API, .NET Framework, Node.js, Express.js, Entity Framework Core
Databases	SQL Server, MySQL
Auth & APIs	JWT Authentication, Role-Based Access Control (RBAC), REST APIs
Tools	Git, GitHub, Visual Studio, VS Code
Concepts	Object-Oriented Programming (OOP), Data Structures & Algorithms, MVC Architecture, Authentication & Authorization

PROJECTS

CampusGo – Campus Food & Parcel Delivery Platform

- Developed a full-stack campus delivery platform for food ordering, parcel delivery, and runner-based earning features.
- Implemented secure JWT authentication, role-based access control, and OTP-based password recovery system.
- Built scalable REST APIs and real-time order lifecycle management **using React, Express.js and MongoDB**.
- Integrated Cloudinary image upload, persistent cart functionality, and responsive React-based UI.

BlogSphere– ASP.NET Core Blog Website

- Built a responsive blog web application using **ASP.NET Core MVC, Entity Framework Core, SQL Server, and Razor Pages**.
- Implemented authentication, CRUD operations for posts/categories/comments, and rich text editor integration.
- Designed category-based blog listing and detailed post pages with dynamic comment functionality.
- Used Entity Framework Migrations and MVC architecture for scalable backend development.

Readora– Online Book Shopping Platform

- Built a full-stack blogging platform with user authentication, blog publishing, category management, and comment features.
- Developed CRUD functionalities for posts and categories using **ASP.NET Core MVC and Entity Framework Core**.
- Designed responsive blog pages with rich text editor integration and scalable MVC architecture.
- Implemented role-based authorization, efficient database handling, and clean backend architecture for high performance and maintainability.
